## **ARCADE CUP 2019**

The first eSport Racing Event  
of the Amusement Market

Tecnoplay, official distributor of the racing game Racecraft for the Amusement market, in collaboration with Italian Exhibition Group presents the first edition of the Racecraft Arcade Cup hosted from the 13 to 15 of March in occasion of the Rimini Amusement Show 2019, located in the Events section of stand C4.

The Racecraft Arcade Cup is an e-Sport style event unique in the market. Qualifications will take place every day of the event from 10:00 am, and at 17:00 pm the best drivers will dispute the final on the 4 Racecraft seats specifically configured in tournament mode, and winners will receive rewards at the end of each day.

Participation for the Racecraft Arcade Cup is free and available places are given in order of arrival and registration at the Racecraft Arcade Cup stand.

Some of the places are reserved to the best drivers selected by amusement arcades owners that purchased the 2 or 4 seats versions of Racecraft.

Racecraft is the first driving simulator created specifically for the Amusement market, and is enjoying great public success.

Tecnoplay aims to show insiders who will participate to the Rimini Amusement Show 2019 how to engage and retain clients of Amusement Arcades and Family Entertainment Centers with an innovative proposal of positive and sporty entertainment.
